How are mini-grids and Captive Power Generation transforming Nigeria? Mini-grids and captive power generation are transforming the way electricity is delivered in Nigeria. By providing reliable, sustainable, and affordable power to underserved areas, they are helping to bridge the energy gap and promote economic growth. Why do Nigerians need mini-grids? Nigeria, with its vast population and growing economy, faces significant challenges in providing reliable electricity. Many rural and remote areas remain underserved or off the national grid. Mini-grids offer a solution by delivering power to these areas where the traditional grid is unreliable. How much SCOE is needed for on-grid electricity generation in Nigeria? A study of biomass and hydropower is warranted (Figure 4. Components of SCOE in USD/kWh) of on-grid electricity generation in Nigeria assuming 40, 60 and 100 USD/tCO_{2e} and including costs of air pollution, nuclear accident risks and system integration. Generation Cost On-grid Electricity Are off-grid solar PV systems cost competitive in Nigeria? Even the cheapest fossil-fuel based generation. In off-grid generation, off-grid solar PV systems are already cost competitive in Nigeria on a lifetime basis, costing an average of USD 20 cents/kWh as opposed to diesel generation. What are mini-grids & captive power plants? These systems allow single users to generate their own electricity, ensuring consistent energy access and reducing reliance on the national grid. Together, mini-grids and captive power systems address Nigeria's diverse energy needs across rural and urban areas. What Are Mini-Grids and Captive Power Plants? Should mini-grid equipment be regulated in Africa? Given that mini-grid equipment come into African market from multiple sources and at the different landing costs, the regulator needs a range of values for each item of interest. The floor and the ceiling would be modified with availability real life country data. As the market becomes matured a single value benchmark may become advisable.
