

How much will Oman's power sector invest in the next six years? Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to . What was Oman power & water procurement company before rebranding? It was Oman Power and Water Procurement Company before rebranding which was on 18th May . capacity of 500 MW planned for COD in (5) a wind IPP of around 100 MW planned for COD in Q3 and to be located in the Sharqiyah region; and (6) Development of Waste-to-Energy project for COD in . What is the most optimum generation mix for Oman up to ? PWP about to finalise a strategic study which identified the most optimum generation mix for Oman up to . For the next Solar PV IPP PWP exploring the options to include a small scale BESS; co-located with the PV Plant. The main purpose is for frequency control and to increase the plant availability during the ramp-up and ramp down moments. What is the main interconnected system (MIS) in Oman? The Main Interconnected System (MIS) serves the largest population area and the greatest demand for potable water in the Sultanate of Oman. PWP provides desalinated water Nama Water Services<sup>12</sup> and it's responsible for potable water supply to consumers. What is the term of contract for Manah & Rusail power plant? The term of the contract for Manah Power Plant is until the end of December with a provision for early termination. While the term of contract for Rusail Power Plant (GT7& 8) is till end of December . PWP has contracts with other generation sources where the contractual commitment is not for firm capacity. Does PWP have a power supply plan for Duqm and Mahout? PWP developed supply plans accordingly for Duqm, Mahout, and the MIS. These systems will be fully integrated and power flows between them will not be considered as capacity transactions. The 400 kV connection with the PDO system at Nahadah enables large-scale capacity transactions and operational integration with PDO. In addition, in PWP will conduct study to evaluate the potential role of energy storage technologies in Sultanate of Oman's power system over the period to and another study to review the Bulk Supply Tariff Methodology for the electricity. In addition, in PWP will conduct study to evaluate the potential role of energy storage technologies in Sultanate of Oman's power system over the period to and another study to review the Bulk Supply Tariff Methodology for the electricity. This statement provides a 7-year outlook for power in the main power systems of Sultanate of Oman: the Main Interconnected System (MIS), the Duqm Power System, the Dhofar Power System (DPS), and the Musandam Power System (MPS). The 7-Year Statement also provides an outlook for desalinated water PWP is a regulated entity with obligations to procurement capacity and output via contracts, to meet demand. Existing: o 9,716 MW generation capacity (13 plants). 1,336,000 m<sup>3</sup>/d desalination capacity (10 plants). Under construction: 600,000 m<sup>3</sup>/d. reach 30% generation by and 35-39% by . A According to a senior official of Nama Power and Water Procurement Company (PWP), the single procurer of power and water capacity in the Sultanate of Oman, the upcoming 500 MW Ibri III Solar IPP -- currently in the early stages of procurement -- will include a sizable battery storage option.
