

## home battery pack project financing options in Dominican 2025

Last year, the Dominican Republic added 275 MW of solar generation capacity, and an additional 78 MWp under a net metering program to pay the owners of self-consumption systems who inject surplus electricity into the grid. Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by during a speech at a Caribbean energy forum. Santos said a renewable energy tender this year, involving the National Energy Commission (CNE), would be a notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the spot market without a power purchase agreement (PPA), showcasing the growing confidence in the Dominican energy market. The Dominican Republic is poised to embark on an ambitious development agenda in 2025, with the government authorised to secure over US\$6.5bn in international financing. This decision, embedded in Article 71 of the National Budget, signals a significant commitment to addressing critical needs in the energy sector.

Energ&#237;a Tur&#237;stica S.A. (Enertur), a subsidiary of InterEnergy Group, has secured financing from IDB Invest, FMO, and FinDev Canada for the development of a new 70 MW solar PV and 30 MWh battery energy storage system in the Dominican Republic.
