

## total investment cost of standalone energy storage project in South Africa

Where is Africa's largest battery energy storage system located? Africa's largest standalone battery energy storage system (BESS) project, the 153 MW/ 612 MWh Red Sands project in the Northern Cape, has reached financial close, having raised some R5.4-billion in debt financing from Absa and Standard Bank. How much does a battery storage project cost in South Africa? The commitment to battery storage solutions is becoming increasingly significant as South Africa faces ongoing energy challenges and seeks to augment the integration of renewable power sources. The estimated cost of the Mogobe BESS project stands at ZAR 3bn (US\$170m), with the primary funding -- about 90% -- sourced from non-recourse project debt. Why is energy storage important in South Africa? Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid - this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to transition to clean energy. How much Bess capacity has South Africa procured? To date, South Africa has procured a total of 1 744 MW/ 6 979 MWh of BESS capacity across three public procurement bid windows in line with the edition of the Integrated Resource Plan. The project's total cost is R3bn (\$170m), with Scatec's EPC contracts accounting for 83% of the investment. The project is Africa's first and largest standalone dispatchable BESS. Credit: Phonlamai Photo / Shutterstock. When will a battery energy storage project close? This last project is finalising preparations and final conditions to reach commercial close in early . "A further two battery energy storage bid windows are currently underway. Bid Window 2 (totalling 615M) is currently in the evaluation phase, with bid announcements expected within the next few weeks. Working closely with leading global battery and balance-of-plant suppliers, Globeleq estimates that the project will require an investment of approximately US\$300 million and will take 24 months to construct after financial close, which is expected in . Working closely with leading global battery and balance-of-plant suppliers, Globeleq estimates that the project will require an investment of approximately US\$300 million and will take 24 months to construct after financial close, which is expected in . Africa's largest standalone battery energy storage system (BESS) project, the 153 MW/ 612 MWh Red Sands project in the Northern Cape, has reached financial close, having raised some R5.4-billion in debt financing from Absa and Standard Bank. The project was selected as a preferred bidder in The Department of Electricity and Energy has stated that the signing of the agreements with the additional two projects has secured a total of 360 MW/ MWh of storage capacity under the country's first grid-scale batter Bid Window. EDF International and their project partners, Mulilo The estimated cost of the Mogobe BESS project stands at ZAR 3bn (US\$170m), with the primary funding -- about 90% -- sourced from non-recourse project debt. This considerable sum, specifically ZAR 2.7bn (US\$154m), is being facilitated through the Standard Bank of South Africa, serving as the mandated Globeleq will work on Africa's largest standalone battery energy storage system closely with leading global battery and balance-of-plant suppliers. According to the company, the project will require an investment of approximately US\$300 million and will take 24

## total investment cost of standalone energy storage project in South Africa

months to construct after financial This R5.7 billion (US\$300 million) investment therefore represents a flagship project financed by the UK as part of its commitment under the Just Energy Transition Partnership agreed at COP26. The Red Sands project is in the Northern Cape, about 100km southeast of Upington, and was originally The Red Sands project is 100km south-east of Upington and will be the largest standalone battery energy storage system in Africa when completed, Globeleq said. Globeleq estimates that the project will cost approximately R5.7-billion and will take 24 months to construct. "The project was originally South Africa's largest standalone battery storage project Africa's largest standalone battery energy storage system (BESS) project, the 153 MW/ 612 MWh Red Sands project in the Northern Cape, has reached financial close, having SA's battery energy storage gets a R4.7 billion boost"The projects will attract a total investment of R4.7 billion. South African entity participation of around 42.23% and BEE ownership of 40% have been achieved across both projects. Scatec Unveils Major Energy Storage in South AfricaAs South Africa advances its energy procurement and grid stabilisation strategies through these critical projects, the role of entities like Scatec and Standard Bank will be increasingly central in achieving the nation's Globeleq to build Africa's largest standalone battery Battery storage is an essential enabler of renewable-energy generation, and the market for these systems is growing rapidly in South Africa and worldwide as a means of resolving energy crises and tackling climate Africa's Largest Standalone Battery Energy Storage System has The Red Sands project is 100km south-east of Upington and will be the largest standalone battery energy storage system in Africa when completed, Globeleq said. Globeleq Energy storage project epc budget table The Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, Globeleq To Build Largest Standalone Battery Energy Storage This R5.7 billion (US\$300 million) investment therefore represents a flagship project financed by the UK as part of its commitment under the Just Energy Transition an enormous boom year for energy storage in Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration. Globeleq to build Africa's largest standalone battery UK company Globeleq, the leading independent power company in Africa, today announced that its Red Sands project in the Northern Cape has been awarded Preferred Bidder status in South Africa's Energy Storage GLOBELEQ'S RED SANDS PROJECT AWARDED Red Sands will be Globeleq's first largescale Battery Energy Storage Solutions (BESS) project in South Africa where the Group also owns and operates eight renewable plants (six solar PV, Scatec reaches financial close for 103MW BESS in Renewable energy provider Scatec has reached financial close for the103MW/412 megawatt hours (MWh) Mogobe battery energy storage system (BESS) facility in South Africa. The company is preparing to begin the Africa's largest battery energy storage project reaches This project, located in the Northern Cape, is the largest standalone battery energy storage system in Africa to reach this milestone.
