

## turnkey rooftop solar battery EPC contract price in Argentina

Will EPC contracts provide for the handover of a solar facility? EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed. Should you choose an EPC contract for a solar project? Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project. What are the disadvantages of an EPC contract? Another major disadvantage of an EPC Contract becomes evident when problems occur during construction. In return for a guaranteed price and a guaranteed completion date, the Project Company cedes most of the day-to-day control over the construction.

**AVERAGE COST OF SOLAR PANELS AND INSTALLATION** This price is for a 10 kW solar system plus a 28 kWh solar battery. On average, a 10 kW solar system with battery costs around \$36,819, ranging between \$34,270 and \$39,370. PV and prices, the (not so fast) uptake of solar in If a small turnkey rooftop PV system costs more than double the price in Argentina and Chile (\$1,750/kW) than in neighbor Brazil (\$800/kW) or across the world in distant Australia EPC contracts in the solar sector The Project Company needs only to turn a key to start operating the facility, hence EPC Contracts are sometimes called 'turnkey' construction contracts.
