Should you use an off-grid solar panel system in Indonesia? Using an off-grid solar panel system is the most cost-efficient solution to generate your power needs when your property has no option to connect to the PLN grid in Indonesia. How much does a solar system cost in Indonesia? The average pricing of a solar system in Indonesia is IDR 15 - 21 million per kWp installed and even less if for larger installations. For the batteries, you can expect to pay an additional IDR 10 - 12 million per kWh for LifePO4 lithium batteries, which give you the biggest bang for your buck. What is a smart off-grid Solar System? Our smart off-grid solar systems consist of 3 main components: solar panels, lithium battery (s), and hybrid inverter (s). Solar panels only produce energy when there is direct sunlight. In Indonesia, this translates to roughly 4.2 kWh of energy per kW installed. How much electricity does an off-grid Solar System use? For an off-grid solar system, the capacity of your solar array must be able to offset your electricity consumption during the day and charge your batteries simultaneously. As previously mentioned, in Indonesia you get an average of 4.2 kWh per kW of solar installed. Are off-grid solar and battery systems a good investment? Off-grid solar and battery system offers a very attractive ROI up to >300% compared to conventional gensets. We use Tier 1 solar panels manufacturing with the highest German standards Unlike generators, our smart lithium batteries require no maintenance or refueling. Should you invest in an off-grid Solar System? Unless you are unable to connect to the PLN grid investing in an off-grid solar system doesn't make financial sense. However, it is an entirely different story if this household or property doesn't have access to the PLN grid and was planning to use a fuel-based generator anyway.
